

TYPICAL ANALYSIS

OmniBoost-K is an, organic based, foliar feed that ensures optimum crop production. Specially formulated with fulvic acid and amino acids for harsh Australian conditions OmniBoost-K is an essential component to relieve stress and boost the anti-oxidant system of the plant. OmniBoost-K rids the plant of toxins built up during periods of stress, repairs chlorophyll and restimulates the plant.

	%(wt/vol)
Total Nitrogen (N)	6.00
Total Phosphorus (P)	13.00
Total Potassium (K)	3.10
Total Sulphur (S)	3.30
Total Magnesium (Mg)	2.00
Total Manganese (Mn)	2.90 (EDTA)
Total Iron (Fe)	0.26 (EDTA)
Total Copper (Cu)	0.34 (EDTA)
Total Zinc (Zn)	2.00 (EDTA)
Total Boron (B)	0.35
Total Molybdenum (Mo)	0.04
Total Cobalt (Co)	0.02

Give your production a boost with OmniBoost-K.

REDUCING STRESS FOR BETTER CROPS

All plants experience some form of stress several times every day. This forces them to divert energy away from growth and development, in order to respond to these stresses and repair the damage they cause.

Research has led to the development of a number of strategies for manipulating the physiology of the plant in order to reduce the impact of stress. OmniBoost-K is one such specialised foliar product with multiple modes of action, designed to reduce plant stress and increase crop health, providing optimum yield and contributes to quality produce.

OmniBoost-K acts at the cellular level to precondition that plant so that it can respond to stress without taking energy away from growth. It does this by:

- Supplying some additional nutrition to keep plant energy levels high.
- Boosting levels of mineral co-factors in the anti-oxidant system (Cu, Mn, Fe, Zn).
- Supplying amino acids needed in making proteins and enzymes used in dealing with stress
- Providing natural plant growth regulators to stimulate the necessary physiological responses.

Availability: 20 litres, 200 litres and 1000 litre containers

GIVE YOUR PRODUCTION A BOOST

OmniBoost-K when applied as a foliar spray has the following benefits:

- Overcomes nutrient deficiencies
- Supports the anti-oxygen
- Delays premature crop senescence
- Improves profitability
- Boosts root growth
- Builds resistance to stress
- Maintains chlorophyll
- Improves fertiliser uptake
- Improves drought resistance
- Increases crop yields.

APPLICATION RATES

BROAD- ACRE CROPS:

Apply 2.5 to 5 litres of OmniBoost-K with 50-60 litres of water per hectare as a foliar spray. Apply when plants have sufficient leaf area. Repeat after 3-4 weeks.

VEGETABLES:

Apply 5-7 litres of OmniBoost-K with 500 litres of water per hectare in a maximum 1% concentration. Lettuce max 5L/ha. Repeat every 2-3 weeks during growing season.

VINEYARD:

Apply 5 litres per hectare in no more than 1% concentration. Orchard Crops: Apply 5-10 litres per hectare in a maximum 1% concentration.

OTHER CROPS:

Apply 5-10 litres per hectare rate and repeat 2 weeks after first application with a 1% concentration.
