

OmniBlue Compound Fertiliser

OmniBlue contains the ideal 1:1 ratio of potassium and nitrogen for plant production. It is also enriched with a range of trace elements that are generally low in Australian soils. OmniBlue is ideal for use in vegetable and row crops, and also orchard crops and vineyards.

Being a great all-rounder OmniBlue excels as both a planting or basal fertiliser and a sidedressing option. Because of the well balanced mix of minerals in OmniBlue is a great choice in any situation.

OmniBlue is available in 25Kg and 1200Kg bags.

12-5-14 (SOP) + 13S + 1.2 Mg

OmniBlue	Specification wt. %
T-N (Total Nitrogen)	12.0 Min
U-N (Urea Nitrogen)	1.0 Min
A-N (Ammonium Nitrogen)	11.0 Min
Total P	5.0 Min
Citrate soluble P	4.78 Min
Water soluble P	4.25 Min
Water soluble K	14.0 Min
Magnesium Mg	1.2 Min
Sulphur (S)	13.0 Min
Particle size (2-4 mm)	90.0 Min
Color - Blue
