Rhizovator™ OB

PROMOTES BIOLOGICAL DIVERSITY, SOIL HEALTH AND NUTRIENT AVAILABILITY

ANALYSIS

ELEMENT	%W/V
Potassium Humate	18.20
Potassium	4.66
Potassium Fulvate	0.50
Nitrogen	0.25
Amino Acids	
Growth Regulators	

DIRECTIONS FOR USE:

Rhizovator™ OB is formulated for the stimulation of beneficial soil fungi and to help create biological diversity. For best results, mix 150ml of UAN per litre of Rhizovator™ OB used.

APPLICATION:

This product must be applied to the soil and can be diluted for ease of spreading. For the best results on sandy soil a combination application with K-Humate is recommended.

Orchard Crops: Apply 5L/ha per month through the irrigation system from fruit set to the middle of the fruit enlargement growth stage (at least 20L/ha per season).

Broadacre Crops: Apply 5L/ha Rhizovator™ OB down the tube at planting in a convenient volume of water. For irrigated crops or high yielding crops, the application can be repeated one month later.

Potatoes: Apply 10L/ha Rhizovator™ OB in combination with 20L/ha K-humate 26% one week before planting; repeat when the second leaf of the main stem has unfolded and again when the first basal side shoot is visible.

When mixing with other liquid fertilizers, test for compatibility with a small quantity in a jar.

Do not mix with low pH products

Rhizovator™ OB

Rhizovator™ OB has the potential to:

- Improve biological diversity
- Stimulate root systems
- Feed beneficial microbes including fungi
- Act as a natural chelating agent
- Promote soil health
- Improve nutrient availability
- Improve yield and quality

CAUTION:

Avoid contact with eyes.
Keep out of reach of children.
If swallowed seek medical advice.
Do not store in direct sunlight.
